

# SKYPE

Skype is a program that lets you talk to a person face to face just on the computer. You can download it to your computer or to your mobile device.

1. The first thing you need to do if you haven't already you need to download Skype. If you're downloading Skype to a mobile device you will need to get it from the app store. If you are downloading it to your computer then open a new internet browser.

2. Next type into the search bar Skype or Skype download. You should then see something like this.

3. Then something like this.  
Press download now.

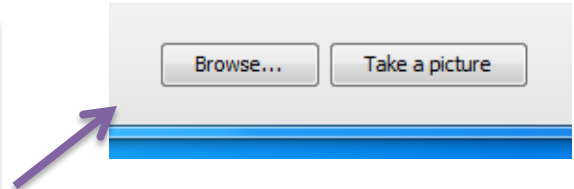

4. Now you should see this screen. Click create a new account. If this screen is not what shows up first for you don't worry it will take you right to the questions to create a new account.

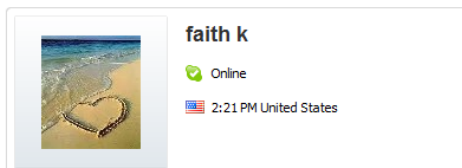

5. Once you answer all the questions to create an account this will appear. This is to test your camera quality and sound

6. Then in the bottom of your screen you will see these two buttons. These will help you take your profile picture. To take a picture of yourself click take a picture. If you want your profile picture to be something else click browse and you can browse your files.

You're all set up and ready to add your friends, family and colleague

Then this screen will appear, now click continue.
